I downloaded this skin and it has a couple of w3d models in it. Its called "Ice Flame"

Heres an image from where I got it.

Looks nice but Renguard won't let me use it.

Info:

Changes:

-Nod flamethrower and flame tank shoot a blue white flame gas.

-Nod flamethrower and flame tank are blue.

-Previous scorch marks are now ice marks.

-Burning left by the flame is now ice mist.

-Nod flamethrower and flame tank Pt icons fit the models.

Possible to allow the w3d files that come in the .zip?

EDIT: Added image enlargent for when clicked on.
