Did you install the normal or the first decade version? If you installed the normal version, did you apply patch 1.037?

You did not update to the newest version of Renegade before you installed renguard. That is something you MUST do in order to get Renguard to work.

Uninstall renguard.(With the renguard installer or add and remove programs)
Download THIS OFFICIAL RENEGADE PATCH

Install it to your renegade folder.
Then install renguard.
