I could have sworn that someone posted a picture of their wallpaper that had the moon crashing into earth a long time ago in a desktop thread. But or the life of me, I can't find the post or the website that he or she got it from.

Does anyone know the website (or can anyone find the post)? or am i just imagining things things that were never posted...

No, I seem to remember something similar. Just can't remember where, of course.

That might of been me. Sadly, I've changed desktops long ago. I found the desktop of DeviantART, though.

These aren't what you were looking for, but maybe one of them could make a good substitute.

I've got that file lurking around somewhere. I'll just dig it out from under the rest of the crap on my hard drive...

damn... the signature on the bottom is missing. What i'm really trying to do is find the website of the guy who made that. Thanks though... it's now my wallpaper at work.

The person who made the image is Greg Martin (Their Site)

The name of that image is called: Cataclysm
