[View Forum Message](#) <> [Reply to Message](#)

---

For linux servers with Core Patch 1 already installed (i.e. brenbot, proper LFDS binary etc), download and run this

<http://download.renguard.com/cp2/sscp2.run> (its a shell script with a TGZ file on the end)

For linux server without Core Patch 1, download and run this

<http://download.renguard.com/cp2/sscp2all.run>

For windows servers with Core Patch 1 already installed, download and run this

<http://download.renguard.com/cp2/sscp2w.exe>

For windows servers without Core Patch 1, download and run this

<http://download.renguard.com/cp2/sscp2allw.exe>

The linux installer uses makeself to make the installer and the windows installer uses Nullsoft Installer (since its my first time with Nullsoft, hopefully I got everything right)

It would be good to see some servers run Core Patch 2 (especially the new maps)

I was unable to figure out how to get the windows installer to add the new maps to svrcfg\_cnc.ini so if you want this, you will have to do it manually

Clients should recieve it downloaded automatically through RenGuard.

A stand-alone non RenGuard installer will be provided as soon as we can.

People with Core Patch 2 Release Candidate 1 can get the new readme file here:

<http://download.renguard.com/cp2/readme.txt>

Also, clients with Core Patch 2 Release Candidate 1 should download and use

<http://download.renguard.com/cp2/mixfiles/game2.zip>

if they havent already done so.

Please report any issues with Core Patch 2 on these forums so everything can be kept in the one place. If it is something that needs to be kept private (e.g. an exploit), private message me with the information.

Questions are best asked by contacting me through MSN, AIM, ICQ or Yahoo.

Just some notes on the install process.

When you start RenGuard, it should say something about doing a Core Patch precheck.

Then, it should check your maps and stuff.

If any of them dont match what Core Patch 2 is looking for, it will give you an error and display a list of links in the web window.

Download and unzip these files (into the renegade data folder).

Should any of them give you a 404 error (or any other error), PLEASE let us know which one right away (posting here is good)

Then re-start renguard.

Once all the files are correct, it will start downloading Core Patch 2.

For people with Core Patch 1, it should download cp2.zip

For people without Core Patch 1, it should download patchall.zip

If it doesnt download the right file (e.g. patchall.zip for people with CP1 installed), it indicates a problem somewhere (if this happens to you, post here (with your AIM/MSN/ICQ/Yahoo if you have it) and I will help you out (or just talk to me on AIM/MSN/ICQ/Yahoo)

Also let me know if the Core Patch 2 downloader starts up and downloads but then gives an error about "old file not found" or similar (look for a label on the download form that tells you the file that its looking for, I need that information too)

A request: could you add a 'none' button in keyconfig so I can disable all taunts for exemple? Or can it be done with the 'add key' thingy?

I do not know if I am in the position to post this.

But i made a walkthrough on an often accured error.

this is what i have been told to do on #bhs\_support.I originally made the walkthrough for my clanmates.

if im not in the position to post this feel free to delete it.

Okay here it goes.

Alot of people have been receiving an error as in this one

if you got this error check the dl info. and see with what file it is busy when it gives you the error:

As you see it is busy with C&C\_Volcano here.

what you do is go to C:/weswood/renegade/data. and there you delete the C&C\_Volcano.mix AND C&C\_Volcano.thu file. (Volcano is only an example this goes for others map also. depending on what map it gives an error)

then you start up renegade again. Renguard will then tell you that this file is missing and gives you the opportunity to download a map through renguard

this will open winrar/winzip and give you the file.

download it and put it in C:/westwood/renegade/data

then you start renguard again and it will let you install core patch2.

I had to download pretty much all default maps. so you might have to this procedure several times but bassicly its the same everytime.

ps: I got my Weswood at C: directory.

others might have it like this:

C:/Program Files/Westwood/Renegade/Data

i still get a weird load up screen, with the original load picture, but still the core patch 1 writing remains. You said i should reinstall core patch 2, but how do i do that without a stand alone

version?

I don't know if this is due to the new core patch, but after i installed it, Renegade freezes when i click on Multiplayer LAN at the main menu.....but i can still got to online so all is not lost .

EDIT: Nope, I was wrong, freezes when i try to go to Advanced Game Listings..... ....and i'm kind of wanting to play renegade.....

I had teh same problem, it's your firewall. Put game2.exe again in the firewall "allowed" list. As this .exe changed, your firewall blocks its attempts to join the Internet.

I get this error..

And the program says Now Unzipping Patchall.zip..

But i already had core patch 1 installed..

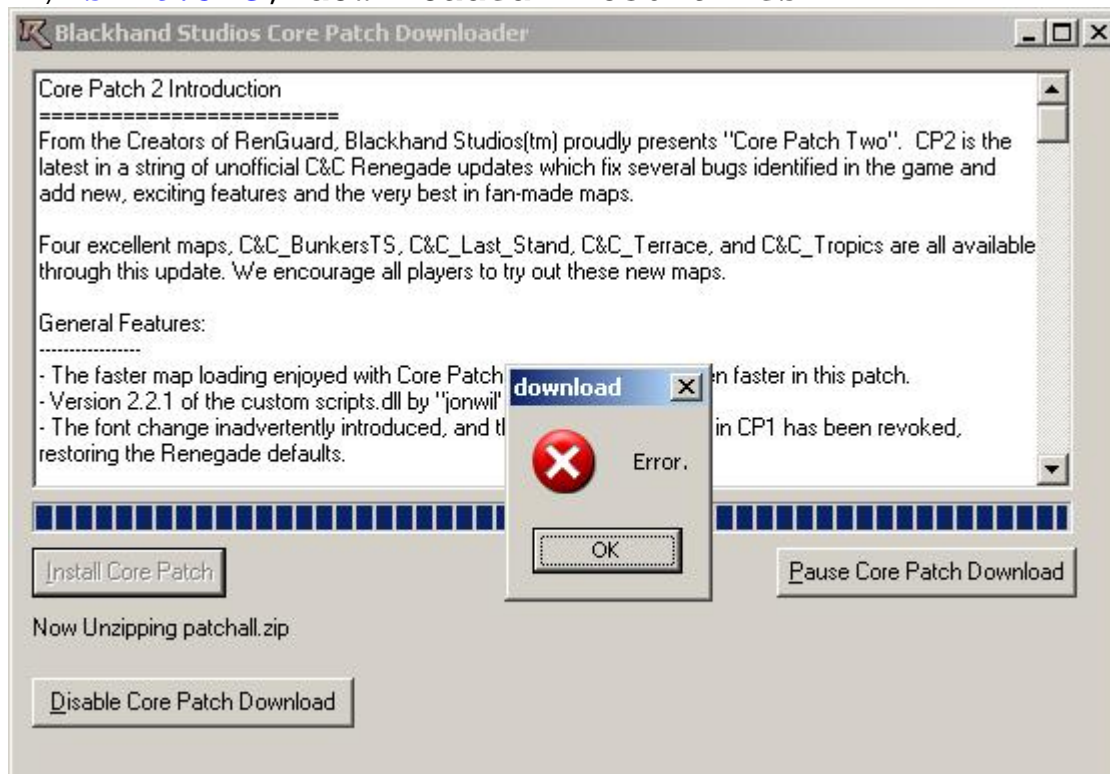

I wanna play renegade.. how can i solve this problem??

Because he isn't going any further with unzipping..

If i wanted to download CP2 trough renguard.. it gives an error..

But when i did the registry stuff.. it absolutely didn't do anything anymore..

So.. here's a solution if you get a download problem..

click this link to download CP2 (35.6MB)

<http://download.renguard.com/cp2/cp2.zip>

---

WAIT!! IT WORKED!!

When it gives the old file error.. download all the maps jonwil put on this site.. replace them.. and start again.. when it gives the error again.. do it again..

Then suddenly.. it starts installing

So thanks for the maps and stuff.. i'm gonna play!!

The loadscreen having no text is by design.  
With the much faster map loading, you dont see the loadscreen long enough to notice the text.

still, it looks awfully wierd without the text, maybe a new loadscreen alltogether? like just text saying loading? and some nice backdrop.

With the new Game2.exe i get kicked of every renguard server ??

Why is that?

I get kicked cuz they suspect me cheating or something..

Can i play with core patch 2 with the original game2.exe? If yes, someone would like to upload it for me?? cuz i dont have it anymore

Try the instructions in this thread:  
<http://www.renegadeforums.com/index.php?t=msg&th=18892&amp;start=0&rid=40>

The other links you downloaded are for the Win32 FDS.  
Or you can just let RenGuard download it.

This sounds like either a) bad ram or b) a bug in the installer. You aren't getting random "Access Violation" errors, are you?

I have downloaded core patch 2 for the first time. I downloaded it and everything went smoothly. The only problem is that lately I have been having problems with my fps. It has been jumpin form 60 to 40 to 30 and then back to 60. Any ideas as to why this is happenin? Oh yea i am using the no cd patch that came with core patch 2 btw.

Im getting this error when i patch CP2 through renguard. It does a few maps and gets to the end of always.eng and I then recieve this error message "Verify of new file failed. Possible internal error. Note the error you are getting as well as what file is being patched and contact Blackhand-Studios at [www.Blackhand-Studios.org](http://www.Blackhand-Studios.org) for assistance."

What can I do about it or there is nothing as I've unistalled renegade and reinstalled fresh then renguard which installes CP2 fresh after downloading patchall.zip. Downloaded always.dat and three maps.
