Make sure internet is connected.
Check firewall.
Thats all I can think of. If your server crashed it would still log you onto WOL.

Hmmm...Something in your server.ini file had been changed causing your server not to be able to connect to WOL.

The second one there. But its probably not that. I'm not sure anymore. Maybe someone else could help you with this.

is your password correct and your account name?
When your settings arn't right he will give this also...
I don't know or this it is...
Try it...
more i can't do.

Try reinstalling a new FDS with a different nick. If that doesn't help it's not your settings but some sort of network related issue. Your IP might even be banned from XWIS
