Ok, so I got RenGuard and all that but when I try to install Core Patch 2, it says that some files are corrupted. This is what it says,
"RenGuard has detected corrupt files. In order to install Core Patch 2, you need to install fixed copies and extract them to your Renegade directory. Mix files (maps) belong to the data directory. Click on those download links, unzip the files and put their contents in your Renegade/data directory to overwrite your files that do not match our expected profile, and when you are done restart RenGuard.
C&C FieldTS
C&C Snow"
 I clicked on the links and downloaded the files but when I went to extract them, I didn't find the Renegade/data folder. How do I fix this problem? Can someone please help me out here? And the two maps are the ones that are corrupted somehow.
