hi guys
when i make my gameserver on wol my firewall blocks the logging in to xwis.. if i turn my firewall of i can perfectly login.
could 1 of you tell me witch port i need to open so i can run my xwis dedicated server behind my firewall?

I'm not sure, but don't you set the port it uses YOURSELF in your server.ini ?

I use Kerio Winroute 6
and no i cannot set it up in my server.ini alle the ports i have setup there i also opened in my firewall and still it wont work..
please someone help me out

I had this same problem.. I just did this, and it started working perfectly:
Quote:"What firewall ports do I need to open to play on WOL? Why can't I connect to WOL?

Be sure you have a stable internet connection. Also, if you have a Firewall or Router please open the standard WOL ports. You will need to enable some ports to UDP traffic in order to communicate with Westwood Online. Ports 1234, 1235, 1236, and 1237 should allow UDP traffic.

Also, ports 7000, 3840, 4005, 4808, and 4810 will need to be opened for all TCP traffic. If you do not know how to configure your firewall, please consult your firewall documentation, contact your system administrator, or contact your Internet service provider."

So try opening 1234-1237 for UDP traffic and 7000, 3840, 4005, 4808, and 4810 for TCP traffic in your firewall.

OK now the follow
he sais
Initializing Westwood Online Mode
Got Server list
Loggin onto USA Server
Failed to log in, retrying
Logging on....
Failed to log in, retrying

Thats the gameport, the port that is used for players to connect to the game.

Im surprised your still getting this after Ralphzehunter gave you them ports to open. That would have been the 1st move I would make.....

---

no it wasn't the game port it was port 4010TCP
the gameport was already opened...
but now it works...
