Hey all, long time no post. Im glad to see people are still into modding gade, anyways. I downlaoded Gmax off turbosquid, installed, then I get the gmax registry crack, I ran both, and when I went to start Gmax, the splash came up, the lil task bar start showing what it was loading then it said Gmax is starting...., the splash closes, and nothing happens, what do I do? Ill get renx when I fix this problem, thanks!
