Awhile back I remember seeing on cncden or cncgames, (can't remember which one), an unofficial patch that fixed a lag problem on Windows XP when buildings or units would get blown up. For the life of me I can't seem to find that patch anywhere and was wanting to know if anyone here could send me a link to it or tell me where I can find it.

try www.cncnz.com
maybe.. or google it.

I have already tried all, (or most), of the cnc sites...And Google...

That is why I posted here. I haev been searching for it for awhile and still havn't been able to find anything.
