How do I make a vehicle death animation? I'm trying to do one for the A-10, and I have an animation ready for how I want it's death to look like, but I don't know if I'm doing it all right, in-game, it just disapears, don't show the animation.

Can anyone help?

Theres some part in level edit, in the vehicles settings that asks for a vehicle death animation.

I've already set up the death animation, and told it to do that when it dies VIA that option you just said, and it didnt work.
