I have had RG once before. I deleted Renegade since then and then installed it again. Now during the install wizard process when I am downloading RG, it says that the file already shows up on westwood/renegade. What am I supposed to do?

My post in that thread tells you how to manually install RenGuard.

Where can I find these files. I tried opening it up from my computer but couldn't find them. Also, could this problem be solved by reinstalling renegade?
