usually this is caused by joining a server before renguard has finished scanning for cheats. Wait at least 30 seconds before clicking Renegade on the RG window, and it should be ok

Same thing happened to me. So renguard starts scanning right when you run it not when you start Renegade, right? Is there any indication when its done scanning?

Not for RenGuard 1.03. RenGuard 1.04 with the new back-end will be a lot more informative regarding this problem.
