Hey guys,
I recently dug up this:

http://www.cnc-source.com/files//pafiledb.php?action=file&am p;id=332

^the old version of Reborn.

Now, I instailled it, got it working and even tho its from 2003, it amazed me

It still has even a server with bot etc, that they say they get 8-10 people everyday playing! So its still active.

Anyway, i was trying to update it, so i replaced the old scripts with the newer ones, and I even remobed the no-cd check from the old .exe (you need to have the game cd to play the mod)! Throw clear scopne in there, and its 100% updated!

Except 1 thing...it has the capability for renguard, only thing is when i tryed running it from the Reborn dir, it said bad/corrupt always.dbs, always.dat, and always2.dat. So, to get renguard running on Reborn, I would just need you guys to review, and then possibly allow those modded files for reborn like stated in the renegade readme for modded files.

thanks,
trooprm02

For what reason?
Its logical, your client bans the use of modified files, and so its your responsibility to monitor what is banned and not. Stated so in your readme, and you would have lyed to all of us if you don;t live up to it!

What does that have to do with accepting Reborn under the Renguard "wing"?

warranto wrote on Wed, 24 May 2006 16:15What does that have to do with accepting Reborn under the Renguard "wing"?

Because renguard bans the use of the modified always.dat etc files.

And in the readme its says, although it does ban our modified files, it says we can send in files to be checked for cheats etc. and then be allowed if containing none..

Does it say they will accept all safe files, regardless of what it is?

I can't find the readme, so perhaps a direct quote could help?

After installing renguard, it makes a file called RG_Readme.txt
in your renegade folder...

Ah, that's why I don't have it. I had to use the manual install. No readme for me.

So how about keeping the promise?

Quote:Q. What about modified textures ("skins")?
A. RenGuard normally does not block the usage of modified model textures,
   You will receive a notification if any modified textures are found, but you
   will still be able to play on servers that do not have PureMode turned on.
   If you have a modification in the form of a .w3d file such as a different
   weapon, you must contact the RenGuard team to have it analyzed and added

to the database before it will be allowed.

i think that's what he means?

```
File Attachments
1) Readme_RG.txt, downloaded 132 times
```

Ah, I see.

There is no promise there. It just say that you must contact the RenGuard team before it will be allowed.

Nothing there states that they will, absolutely, on all accounts of it being safe, allow it. It just means they have the final say in the matter.

Nothing there states that they will, absolutely, on all accounts of it being safe, allow it. It just means they have the final say in the matter.

So this was the place I started to contact them and hand over the files...so how about it?

Gets files hosted for someone from renguard to review

Will have links soon.

If the RG team are willing to look @ them I can host them for you.. I play the old version of reborn now and then, it's fun but a lot of little bugs and such (and some not so little ones)

Sure that would be great
What need to be checked is the always.dat and always2.dat in the reborn/data folder.
Thanks man

http://www.lmsbc.com/dan/reborn_always.zip

always.dat
always2.dat
always.dbs

should be all thats needed... not sure if game.exe is also needed?

Nope, I used the Renegade No-Cd patched Game.exe, which surprsingly also works for Reborn

Anyways, thanks alot!

P.S, Black Hand Memebers, please review files linked above^^
