hey has anyone had this problem, well idownloaded SSAOW 1.4 (i think ^o)) then i relised i had
downloaded the wrong SSAOW so i downloaded 1.5 and it seemed to be crashing my FDS (as
the new SSAOW and old SSAOW were conflicting) so i deleted my FDS and downloaded it again
put the SSAOW files in my FDS folder, configured the svrcfg_cnc and then started my server and
then this happened (i will upload the pic) if you could help, it would be greatfull, thanks if you can,

File Attachments
1) console box.bmp, downloaded 335 times

aha i fixed it, the server.ini file was missing some vital info, it was missing a bandwith setting ,
good thing i had a old server.ini about on my pc
