Translation:

I keep gettting a common bug in NR that comes up often for me and the only way I can fix it is to download the program and reinstall it. It keeps happening to me   but it is at random and when it occurs the commands do not work. Not even the !help command works and it is really annoying. If someone could help me out that would be swell! By the way I am usi9ng version 0.2.3. Thank you.

hey mosson, wtf does this have to do with RG???
