I have heard people accuse snorcle of using a RenGuard bypass, but I have not found any evidence of him using one successfully. If you have IRC logs/screenshots/video evidence against him, please post it here instead of creating a new thread.

^^ It's impossible to get two kills on the harvester 5 seconds apart with regular timed c4. (Blocks of timed c4 take 30 seconds to detonate and it takes 3 timed c4's to kill a harv.)

It's probably both. Here's an example screenshot from one of Cyberpunk's videos:
