I have a TGA, a texture, I need converted to .DDS..anybody know a program that can do it?(preferably a free one. I'd rather not pay money to convert one or two skins to .dds..) or willing to do it themselves? 'tis the old red flametrooper from Renegade.

```

Theres a tool for PaintShopPro that allows you to do this. I cannot find a link for it though, you might be able to get something here

http://velmar.dladventures.com/tools.htm

Get the nvidia DDS format plugin for Photoshop.

Or, you can have level edit convert them to DDS if you just place them in the mod folder and click the compress textures button before you export (It's a big T and a little T icon on the far end of the Level Edit toolbar).

Does anyone know of a DDS plugin for The GIMP?

Plenty, but they don't work with the format that Renegade uses of DDS files.

Way too difficult... Simply use the DDS Converter 2.1. It supports DDS, TGA, BMP and JPG in one small tool.
