On my profile page (i.e. Death/kill, rank, total points, etc), my points never get updated...why?

The automatic ranking data on XWIS is buggy at best... it's not surprising if it does not work. Although you can make sure you are playing laddered servers, unladdered servers do not report the score.

Also, some servers, such as The KOSs 2 and renstation.net use BRenBot's rank plugin to create their own internal ladder for while you are on that server.

okay...I'm assuming that servers like renarchive and jelllyserver are laddered correctly, right?

Yes, but the ladder you get there only counts on that server.

I'll quote what I already posted when you asked on RenStation's forums.

F15 Wrote :

"This is getting annoying..I play, but don't get points for my WOL profile, only for individual servers...are there certain servers I need to play on or what? Because I already have rank and points from a while ago   "

I wrote :

"When playing on RenStation your WOL rank doesn't go up because our server isn't laddered. (Meaning it's not WOL Ranked.)

Some of the servers on WOL are infact laddered, If you click on the server and look at the botton of the screen it should say wether it's laddered or not.

I hope this answers your question."

Hope that helps.
