...would you accept an expansion pack for renegade, one that added units, missions, game modes, and updated the engine?

cos personally, i think that would be a good expansion

That sounds pretty much like a new game.

But I would buy it.

Of course. I wouldn't be bothered about more msisions, but more units and more maps would be the two I'd want.

More modes would be nice, but we already have those.

3 teams would in the end always mean 2v1 until number 3 dies, then 1v1.

And do you really think that an expansion pack would be worth it for a games that costs 5-10 € nowadays? If the game costs 5 €, you could ask around 3 € for the expansion pack.

Want more maps? I already have around 260... Want more modes? Check the list: there are already too many idiots who created new game modes (co-op, CTF, ...).

The only way to get something like this done is to give the community access to the update servers. However, i'm quite convinced that this would also mean that the one in charge would eventually make capital mistakes and ruin the game for a lot of players.

I think that C&C mode is the only mode that works well for Renegade(well, CTF mode could work too but without mines).

I don't understand why some people play DM. Renegade is team based game only. If you want to play DM, almost every other game that was ever made with multiplayer has DM.

Now when I think of it, Assault mode, Onslaught, Bombing Run , and Invasion just like in Unreal Tournament would work too. Modes like these would be great addition for Renegade.

If I was a modder, I would seriously think about adding some of the mentioned modes.

Renegade simply isn't fast paced enough for infantry only modes. Renegade is much more strategic. CTF on Renegade is boring because you need to run that whole part back. In comparison to UT, Renegade is VERY slow. And for C&C mode, that's the way it has to be!

I think more something like "reborn vs Renegade", the Reborn team could use Reborn technology, the Renegade team Renegade technology.

This is all hypothetical ofcourse as I don't see it being done.

Anyway, if they did release an expansion I would obviously buy it, not caring if it sucks or anything like that. And anyway, if alot of people buy it shows EA that we still have an interest in the renegade franchise and who knows where that could go

and I mean with that, that it will sell even worse then the original game (and that wasn't a big success)

Ever play Renegade: Sole Survivor? mod patch

It's not a perfect recreation of Tib Dawn, but it's slightly closer to it. It would be nice to actually be in a multiplayer game with this mod, instead of just fooling around in a 1-person LAN. Also, it comes with a singleplayer mission! If you're going to try that mission, choose Recruit level, even if you can do Commando in regular Renegade SP. Trust me. Also, don't destroy the Airstrip before

it becomes an objective or the mission won't end properly.

About other game modes on Renegade, if you REALLY want to play CTF, go play Halo. Renegade doesn't make a good CTF game, however it DOES make a great C&C-Mode game (It's the only one).

Deathmatch games also are crap, because Renegade's character battles plainly aren't fun. After 5 minutes, everyone will get snipers, and it'll become more of one of those really unrealistic Sniper wars. (However I'd like to note that infantry battles using free guys can be a hell of a time)

Renegade is meant for full all out C&C Wars, with tanks, infantry, and aircraft all fighting on one side. Having big, strategic battles where you use your mind as well as your aim is what makes Renegade good.

Yes I have, and no that's not a real Tiberian Dawn mod even though it has Tiberian Dawn aspects in it.

If you're talking about the game C&C Sole Survivor by Westwood, it's considered abandonware. Even the copyrights aren't renewed.

Pretty unfortunate really

In simple terms, the game was Tiberium Dawn without buildings, multiplayer Free-for-all only. You control a unit from TD and you can pick up crates to upgrade your unit. You could even control a dinosaur from the dino missions.

The game was released 1997 and the servers were closed mid 1998 (i think) because of poor sales and poor reviews.

Since then, the game has been ignored by both Westwood and EA.

Currently, there are copies available over the net, but because there are no servers, a player can only play in "sandbox mode" against AIs.

Ditto.

EA could always include the original game in said expansion pack

(Then again, this is the company that failed to correctly encrypt serials for a program they've got the source code to for use on an online matchmaking service that they chose to support instead of keeping WOL)

They should have made it into something like Diablo 2.
