For all of those loyal fans of the mod that are left, one of the mods betas has been released, only in a .pkg format unfortunately. This is the most current beta version of the mod and now, with the permission of HTMLGOD I give you SWMOD.

If anyone could host a server with it, we might be able to get at least a couple of large games going.

Feel free to host it were ever, and spread the word of the release, ill see if i can get HTMGO to make an official announcement on the SWMOD site.

BTW: If you want proof of the permission HTMLGOD game me, or any other beta testers, look here <http://newhope.conquergaming.com/>

Oh man, this is a sad day. This release seem to actually regress from where it was. It back to a pkg and slot of the settings are off. Its nice to see the work compiled though.

Will it be played online to?

what will the team do now? move to a other game?

Once I get the time, I'll give it a try. Looks pretty cool on the site; hope it plays just as cool.

I can host an FDS for it if you want, but it will only support about 8 people at a time without lag (10 at a push)

EDIT: Or maybe not, I cant even download it >.<

Quote:Sorry, we have encountered an error. Details are below:

This download would take you to a total downloaded amount of 4,117 MB, which is over your allowed limit of 4,000 MB

Well... since I have never even used this site before, I would love to know how I have supposedly downloaded 4gb from it :S I always get this error on other sites like this as well, it's stupid...

Anyway... if anyone cares to send it to me on Xfire I will host an FDS and upload it to my sites downloads area. (Dont even try it on msn, would take hours).

it's only 150 odd MB.

i might host a server for it, but only for , but only for 14 people.

Yeah my public tools only work on the TC edition, if and when HtmlGod gets me the version on his laptop it will be a tc again. I would convert this one, but its missing about 6 maps that i had setup and were ready to go.

Checked my backups:

I have a version with 4 maps and all vehicles. But its a little out of date itself.

the aircrafts are only a little "needs practice"

Won't it be fun to play with other humans?

danpaul88 wrote on Sun, 03 September 2006 06:21imo the base defenses are over powered, they take out aircraft in 2 hits, and even an overlord struggles to take down even a single patriot battery. I know it's true to Generals in that sense, but for the FPS genre it does not really work.

I love the superweapon targetting though

---

this is the Star wars mod topic

No, he has no time and his current build crashes so its not possible for a finished release.

Sorry if it seems a dumb question to ask, but I'm not as computer literate as it seems most are here.

Once I have the .rar file, how do I get it to work with Renegade?

LR01 wrote on Sat, 02 September 2006 11:18Can I throw the public tools away?

you can throw anything you want

to install you need to un-rar i suggest something like winrar.

then add the pkg to the data folder on server and client, i am guessing

Thanks. Got it to work.

So much promise in this; it's really a shame it never got finished. I can only hope someone picks this up and gets inspired to finish it and release it.

---
