Hey, this skin seems to not work.

It's for the Hand of Nod's globe.

Please please, someone who has made skins, please take a look at it and see what you can do.

Thank you.

Also, in this skin the GDI logo is a little too bright.

The GDI logo needs to be about 15% darker.

I dont get whats wrong with the hand-of-nod ball. Umm, just put the .dds file in the data folder inside the renegade folder.

As for the other file, there is no GDI logo on that .dds file, umm, I dont think you uploaded the right file.
