...but have no proof, as, by the time i started looking out for evidence which i could ss, it was too late, as he was kicked shortly after i started getting them.

i got one, which was of me !RGing him:

he was using a repair hack, and how i found out was like this:

im in a crazy dm server (renz0r) and the map is m10. he is in an orca, and i start shooting him with a laser rifle. anyway, when his orca was nearly dead, he landed on the CY. the target box was still up, and it was repaired almost instantly.

anyway, since i have no proof, he cant be banned from rg, but i thought i'd warn a few server owners

It seems that RG can be bypassed.
I don't know much upon this so it isn't a place for me to talk

The screenshot doesn't really prove anything regarding his cheating. But I'm sure it will be reviewed anyway.

oh damn my post got deleted accidently again!
but no problem! ill repost it again!

lol are you serious?!
there are many (nonpublic) rg bypasses since like forever. but its at least finally bypassed since about march or so when *cheat name removed* got released. not to talk about *cheat name removed*

it always makes me laugh when some stupid/naive people go "omfg.. i found a RG bypasser!!! wh000t rg can be bypassed?!?!?"
/
"help police.. i found somewhone who copies cd's.. i though there is 'copy protection'?"
yeah.. right...

0x90

im not naiive, i know rg can be bypassed.

i also mentioned in my first post i had no prove, and that people should watch out for proof.

i know nothing can be done by the ss, but it was just a warning to look out for him
