the only music you can play is the music which comes inside always.dat, you CANNOT play your own mp3 files or whatever

OR, MP3 files in .mix/.pkg maps (the name has to be exact, and if players don't have the map the music trak in in, they'll not hear it).

how big a list are you looking for?

---

seriously though, put the songs in you're data folder, call them something simple, and then do the command.

i doubt other players can hear it though.

I don't see names of the mp3 (that everybody has, not my music) that I can play in my Data folder.

Use XCC mixer or RenegadeEx to extract/list the files inside always.dat
