easy t fix:

run the ren installer again, but only install westwood online components. this shouldnt take too long.

AKA: He can't re-run the installation program...

The only real solution is probably to reinstall the Ren FDS, afaik that includes the WOL components. Either that or play on GSA...

Yeah, INstalling the FDS does update the components. It also mucks around with a registry key that tells all WW apps where the SIC are AFAIK...

Install the FDS.
