i was playing a online match today, and for some reason (arcording to the guy i shot down) he was stealthed yet i saw him without the stealth effect on him, or him getting invisible at all.

i think its related to my exe as renguard randomly says kicked for bad/curruped .exe all the time.

when starting an online game with bandwidth auto-detect on, instead of saying skip or whatever it was(i dont remember) its says "repair-humvee". repair humvee is part of a mod package i have.

what the bloomin eck has happend?

That can happen if"

1. You are not running Core Patch 1 or Core Patch 2 and they got a stealth crate.
2. You are running either, but you joined after they received a Stealth Crate.

You can download Core Path 2 and they will become invisible or you can carry on as you are.

It's only cheating if the server requires it. But there really isn't a down side to getting it.

I wouldn't consider it cheating, and I've never bothered to get any of the core patches.

If Renguard was reliable, all they could do was accuse you of not following server rules, if the server requires a Core Patch for you to play. (Type !rules and read them carefully). This isn't so much "cheating/haxing" as it is "breaking the rules". Neither of which should be done.

However, Renguard is unreliable and has been exploited, so people can still accuse you of cheating, even if you do use it.

i have the same problem,
i can see ppl with the stealth crate normal like they didnt are stealth

but i had installed cp1...

this was not all the time so, after i had a problem with a GTA A** on a server i written to the server owners and they said

"we will make a !lock and !bind funktion soon just dl (scribts2.dll and same other, i duno the name exakt) to be 100% compatibel with the server"

i did that and now i can see ppl with stealth crate lö
and my clan mates says that i starting lagging by them (if i walk iam starting beaming a little bit....)

i already deleted the file but nothink got chanced....

the most funny think is that the admins all lags hard like me

is this the big cheating trick from the admins ?????

why i cant delet that cheat shit out ?????

ps:

i got cabel and i got mostly the best ping on the server.... fps: is 70 if all are shoting and fireing stuff with 35 ppl on the server. if iam walking alone on a tunel i got 110 fps...

i dont think its my hardware lol
