I am making a box truck because I want to help with role play 2 and there is not a truck like this in it so I figured I would make one!

Ok, it is coming along well but...

I don't have 3DSmax, so I cant texture it.

Would anyone be willing to unwrap it when I am finished making it?

Here is a screen shot of it, I think it is coming out ok!

(Thumbnail so admins will be happy!)

I would, you can also texture it with RenX (RA:APB does have a truck like that, but I will still texture it for you). I can bone it to if needed.
