Well, When I click Renegade, RG Starts up fine, then comes up with this error.. Is there any solution what doesn't involve me re-installing RenGuard / Renegade?

(I'm running Windows XP SP2, 34bit, First time for this error.)

If not I guess i'm forced to.. Also could anyone tell me what the problem is? Just so I don't do it next time.

Do you mean 32 or 64 bit? You seem to have a bit of each there, and I don't like to assume

Based on the fact you have the RG window open I think you meant 32bit, does the problem occur every time or just now and then? Perhaps try waiting a bit longer before clicking anything, give it a chance to finish loading.

do you have the DirectX patch?

the DirectX + Xfire conflict and make RG crash

Good idea nightma, if you did install the D3D9 patch make sure xfire ingame for renegade is either disabled, or correctly pointing to game2.exe instead of game.exe

First off: 32BIT! lol, My Bad

Second: the D3D9 patch, I gave it ago but honestly, I didn't see a difference, And when I start RenGuard for the first time, Nothing happens, when I start it again, It crashes..

sorry for replying soo late, I had to go to bed yesterday, I was almost sleeping on my chair!

the DirectX + Xfire conflict and make RG crash

(took to long, Couldnt edit last post)

Yea I stayed logged out with Xfire, and RG Didn't crash, I guess it was just Xfire GRR!!

Case closed.
