OK, Well I started playing aon a few servers the other day and got asked to prove I wasnt cheating. So I came and downloaded Renguard, installed it, everything went fine. (I have the C&C first decade version but followed your instructions).

I downloaded the core patches, then went to play, but all text within Renegade had turned invisivble, no text was visible anywhere. Theres a screen shot below showing you want I mean.

Any ideas?

Ah, nevermind! I fixed it!

Originally I installed by changinging the path name of the renegade file. I uninstalled renguard, changed the path name back to the original path name with the (tm) in it. Then Reinstalled Renguard by changing its installation destination! Its working a treat now!

I think a reboot of your system usually fixes that error

i has the same problem, but with the renegde installer on the cd yesterday. reboot didn't do it, but the next day it worked. i think there is already a subject on certain days ruining the game. the little box is the checkbox and the big box is the licence agreement lol

I discovered everything still works, even if the text is missing. You can install everything just fine if you know where to click.

Really? I remember trying it without the text, and it failed at some point.
