hello ive tried installing rg again laods of times over the last few months and its same thing everytime... ive unistalled renegade and put it bak in and then still same!

renguard installs and then i goto get patch then this happemns and then im bak to square one whats wrong?

## File Attachments

1) renguard.bmp, downloaded 321 times

There are a couple of solutions:

- 1. Disable core patch updates in the renguard menu. However, you will not get the core patches then.
- 2. Manually install core patch 2: http://www.renegadecommunity.com/page.php?link=rgfag#14

hey guys ive fixed it now but anyone reading this post in the future dont do what the replies say or the same thing will happen

the way to fix this problem is to goto the corepatch support forum on this same site and download all of the origonal maps again i did this and now its working

the problem was i was using slightly updated maps (i kept my old data folder so some maps were different sizes dunno why i didnt mod them!)

but now its ok so just download the origonal maps again and itl be fine

As you didn't give that info, we couldn't know ofcourse. The manual updates of CP's include the original files, I hope.
