I have been watching some Beta Videos from Renegade. It's the one where you play with Logan instead of Havoc. I was watching very well and I saw a Sniper Rifle on Logan's back. It's not the one from the game. Also the weapon HUDS are all different from the ones being used now. Also the rocket launcher is dragged on the players shoulder instead of carried around like Gunner does.

If someone has these files or a mod with all beta files in there, please send me.

i think it is the ordinary sniper, but they have a cover on it. looks like something from another game.
stupid music in the background though.
