Hey guys,

i was just curious into setting up a modded CTF server, and it's not going to well. Bacially the problem is that if I use SSCTF, I have to use the slow (old scripts), because it reads from CTF.dat and adds the other sounds etc. Then I started thinking since it came with objects.ddb file too, i could use SSAOW (rename it to objects.aow), use the 2.9.2 scripts, rename the ctf settings ini to ssaow.ini, and rename CTF.dat to server.dat (which i was hopping would work). Then it didnt cuz i forgot CTF.dat was only for the flag placements.

Anyway what im really asking is how would I be able to run a CTF serv without it saying Gameplay Pending after evermap cuz the fds is still loading?

I have no idea what happened to that post, is:

- 1)is that "SSCTF1.3.1WFDS-2.9.2" folder needed?
 - 2)I thought having an objects.ddb in my data folder would cause the server to not be listed?
 - 3)if i rename it to objects.aow how will SSCTF be able to read it?

Seye said he added his name to the readme, lol

what other credit would he like me to add?

- 2)I thought having an objects.ddb in my data folder would cause the server to not be listed?
- 3)if i rename it to objects.aow how will SSCTF be able to read it?

2 more questions:

- 4)To run the CTF, I cant have CP2 installed on the serv appearently, true?
 - 5)So I should only have the FDS, and SSCTF only?
-
