Put them into the map manually, save and load the .ldd with the original map.

Or you could modify the purchase settings and make them purchasable.

nope

Wow, this must be some sort of super glitch then!

I must have really screwed up in level editor this time!

Then yes you are correct, you could do it through a purchase zone or poking.

Jerad2142, please think a little bit before you post.

SSCTF is a serverside mod.

He said he had a CTF server, you can make your own, I've done it so I thought he had to because he said he had a ctf server.

Cat998 wrote on Thu, 04 January 2007 16:49SSCTF = Serverside CTF

He never said it was SSCTF, he said it was a CTF server, read the original post yourself.

kill4ya2 wrote on Thu, 04 January 2007 07:46Hi,

I have a ctf server and i would like to add reacon bikes how would i go about getting them?

Yes. I never said he did

but he said he is running CTF on the server, so it must be a ServerSide CTF mod (SSCTF), got it now?

Yea but referring back to your original post, Adding a recon bike to the PT is easy. All it takes is a objects.aow.

Tho, Iv'e never tryed SSCTF so it might not work!

Im pretty sure they can be dynamically added. Zunnies server used to have recon bikes and all kinds of other stuff that would spawn, and it was all server side.

There are engine calls in scripts.dll to change the PT settings, if you made a script to call those when the map loads you could easily change the PT on a per-map basis. Of course you will probably need to make your own custom scripts.dll for that...

Yeah but the PT icons will stay the same if you are only changing the scripts.dll on the server.

You might be able to get a mammoth tank when purchasing a buggy, but it will still show the picture of a buggy on the PT. =[

That's right. But you need a pretty new version of scripts.dll on every client to get it working. And 98 % of all players don't have that.

You really can't change the icon? Wow, I never realised that before... always thought you could >.<

Perhaps jonwil will add that in a future scripts.dll?

It IS already in scripts.dll, it just has no effect for none scripts 2.8 users, they simply won't see the changes in their PT.

That's not a problem for the usage I have planned for it then, as the latest scripts will be distributed with the mod (I am talking about Apocalypse Rising here btw)
