You using the first decade?

You using latest patch? (1.037)

Did you even install the westwood online components? (necessary)

You using hacks? (lol jk.)

Relaunch Renegade's setup and only reinstall the 'Westwood internet components'.

This usually happens if u install older wetwood games after installing renegade and you pick to install their westwood online version.

It happens to me without installing anything. If I play ren, then RA2, then try ren again, ren won't work.
