Hi, I don't know about modding and i don't really want to take ages in finding out how to make what i want ,

Yes I'm kind of lazy but i'll give anything a go.

I've just got a sniper server running and i want to have unlimited ammo along with the TIB not affecting you when you walk over it. I bet some of this will be easy to most of you so it shouldn't be a problem in changing>making it

Thanks for your time PunkeD

They can be done in LevelEdit:

- Rename your server objects.aow to objects.ddb
- Open these objects.ddb in LevelEdit
- Edit the values you want for the sniper weapon and general tiberium settings
- Save the objects.ddb file
- Rename it back to objects.aow
- Put it back in the server data folder
- Restart your server

And remember, ALWAYS backup files that you change.

For more detailed LevelEdit usage, you could search for topics in this forum, or that RenHelp website (someone give him that website, I forgot the link).

As for the Tiberium settings you will have to modify the "surfaceeffects.ini" which will be located in the always/ini directory of you mod folder.

Quote:- Rename your server objects.aow to objects.ddb  
Only if you renamed it in the first place.

Quote:- Open these objects.ddb in LevelEdit  
It should open it automatically.

Quote:- Edit the values you want for the sniper weapon and general tiberium settings

Quote:- Save the objects.ddb file

Just go and quit out of level edit, and it should ask you if you would like to save.

Quote:- Rename it back to objects.aow

Only if you did step one.

Quote:- Put it back in the server data folder

If its a .pkg you won't do this .
