I'm looking to make some very specific scripts and have found many game specific terms in the current scripts, but I was hoping to find a full listing if this is possible. Does anyone know where such a list/library could be found or accessed?

To access a full list of the Renegade scripts and their values take a look in the readme files that jonwil ships out with them.

If you are making the scripts look at RenegadeWiki.com (the actual link is in the yellow tool bar at the top of the mod page).

The readme files don't seem to contain everything.

I'm not sure yet but from what I've seen so far the renegadewiki is what I'm looking for, so thanks.
