[View Forum Message](#) <> [Reply to Message](#)

Seeing as lots of you guys have become obsessed with getting and restoring pre-release files, I am starting the new unofficial "Post any Renegade pre-release shit you have and would like to share in here" topic. So, let the sharing begin!

Subject: Re: Pre-Release shit topic

[View Forum Message](#) <> [Reply to Message](#)

Like you said, nobody in the renegade community shares. They say they have something than keep it for themselves so we can all admire them.

Subject: Re: Pre-Release shit topic

chill up, next weekend ill take some time sorting out stuff i got. including the gravgun i promised earlier.

like i told Scrin in PM, most of it is part of an unfinished mod, and i don't really feel like ripping it apart before i even got it finished and polished up.

the files below were added to my screenshot via leveledit. As far as i know there's no way to use them clientsided. At least not with rengaurd starting to cry.

Something else, imo the title and tone of this topic sounds somewhat annoyed.
Pre release shit, topic
Pre release, shit topic
Doesn't mean the possible contents will be any less cool tho.

Hehe well about the nitromod I was creating.

Well I scoped up a lot of the old renegade.

I Have

GDI
Harvy
Hummvee
Medium Tank
Mammytank (mayby muliple versions)
Orca

NOD
Harvy
Buggy (Also another version that shown on zeths preview)
Light (credits to exdeath for fixing it)
Flamer
Recon Bike

Weapons
Pistol
Laser Rifle
Laser Chaingun

Levels
The under skin which gives the beta rocky texture

Buildings
Helipad
adv comm
Temple of nod (known as shrine of nod)

And of course the rest of the buildings suplied in the buildings.zip

What I'm trying to do in my mod is simple. I just want a renegade that looks more like tiberian dawn with most of the westwood works.

If you look at cnc-source.com you will find alot of the old beta but that site has downtimes.

I also have a controlable AGT only it has a few flaws like i need to rebone that thing ^^ So it is not on the levels yet and you cant see stanks and stuff and youi have only the rocket.

There is alot more in those zips like the orca lifter for example. Just hop to www.renz0r.com and look around for nitro threads you will see alot of the orig cnc.

[View Forum Message](#) <> [Reply to Message](#)

Yes and no, The Shrine Of Nod does exist in single player mode, it's in map M10 and M11, but I don't think it's getting ioned. Either if we can get the model out of the single player version and make a similar thing for gdi, it might be a cool multiplayer add-on.

I tried to put all my screenshots of beta stuff in one thread

but im limited to 10 in one post so I have posted them over at renz0r here a link to them ->

<http://www.renz0r-gaming.com/forum/showthread.php?p=20305#post20305>

It will take a will to load up but it is worth it.

You all should be able to see them.

I will fix some stuff put them in zips and mayby upload them.

Enjoy the screenies!

(psssst, you need to register to view that topic reaver)

Ah damn then I will just limit myself to 10 screenshots.

Here goes!

The GDI beta ref!

Inside it

Inside it again!

GDI airstrip

ADV pp + silo + ref

Cargo truck

To the left the nod beta harv (to the right sole survivor harv)

GDI Beta humvee

Orca lifter + Beta Orca with landing gear.

The GDI Beta elevators.

I have way more screenies and stuff. Ill see what I can get fixed etc

I wont release my version of the REF and adv pp yet (btw this adv pp is my own build, westwood didnt release any version of an adv pp)
(as far as I know)

The Ref well that will take a while before I plan on releasing it ->

Currently there is a broken interior callbox which calls the wrong elevator. The real elevator is missing. There are no doors.

A lot of missing textures (im nearly done with those).

I have posted some questions about it on pertoglyph forums (former westwood). I will see what will role out of it.

I can assure you there is a lot of beta stuff to work on and I'm currently looking for peeps who can help me.

Here some more progress on another building the gdi conyard + pp

I will convert a adv pp for gdi out of this single player gdi pp (this pp is damn broken)

Before I release any Building I will try to fix them as best as I can.

MSwindows wrote on Fri, 29 February 2008 15:22I agree but I am also saying that I feel that that they are really cool not just because they were not used. Anyway I like RxD and all that stuff except slave stole the credit and work from Viper:RxD.

I am confused, since when did Vipe become a modeler?

Thats about as stupid as saying I stole the credit from Slave, considering I don't know the difference between a polygon and a pixel.

Slave is the one that makes our maps go Ohhhh and Ahhhhh.

Vipe is the one that makes the servers and IRC stay up.

I complain.

ElloGuy codes in background taking no credit even tho he is the background of the development.

It seems someone has penis envy.

the science facility building on RiverraidsTS was to be included in renegade, you could capture the building and then buy mutants from it. (hence the mutant PT in leveleditor)

could anyone extract it from the map pretty please?

In the Command-Mod-Filepackage unfortunately there are Original-WW-files and others mixed

I need to know, which of these models are Westwood-Stuff:

0.

As far as I know, the MCV's are not westwood?

1.

2.

3.

4.

5.

6.

7.

And, someone has the WW-Files of the Advanced-NOD-Powerplant?

8.

And the FIXED Beta-GDI-ComCenter?

rrutk wrote on Wed, 26 March 2008 08:05In the Command-Mod-Filepackage unfortunately there are Original-WW-files and others mixed

Only the science facility is partly from westwood (aircraftkiller fixed it)

The rest is not made by westwood you just said it yourself -> In the Command-Mod-Filepackage, as beta files I would only trust things from the westwood website OR things you see on westwood screenshots of the beta.

So no, these files aren't released by westwood, all I can tell you that they look representive a fine job

of the command team, I do wonder if someone stil has more files of that mod?

I have no idea why people are still bitching about taking credit for shit. Just place credit where credit is due in the readme to the map file and problem solved.

Once you release something to the public, people are going to manipulate it, whether if it the point of the release or not.

It's apart of the interwebs, grow up and get over it... lol...

If I can upload a few files up onto a server, I'll be glad to share them. I'll do it once I have time to hunt them down. I know I re-boned the med tank and flame tank awhile back and released it, but the source for that died many years ago.

I'll see what I can do to help keep the community sharing (if it ever did, lol). ^^

I get these on Game-Maps.NET soon.

The flamer and med aren't pre-release (but I thought they would be good to post anyways), but they are boned versions of the current models.

Saves time if you just wanted to add a new skin on them. For example, the reason why I did these in the first place was because I was going to make a map that had a vehicle maker that was captureable. So technically, GDI would be getting some Nod vehicles and Nod would be getting GDI vehicles. Change the GDI logo to Nod and make the vehicle black and bam... Nod Med tank... ^^

Edit: And thanks! Laser turret thing I made awhile ago... xD

1.

They planed to have an M16 rifle in renegade:

As you know, in the available part of the commando-mod-package are A LOT of original WW assets. there is also an M16 in.
so, may be, this M16 is westwood???

2.

Does someone has the Beta GDI APC? (it has wheels):

3.

Does someone have the beta chemsprayer?

the M16 in the commando mod is not from westwood.

the apc is not around in ren land as far as i know. The weapon models are around but you will probably never get them.

Those where part of the Renegade beta PAID demo. Those people signed a liscense and are not allowed to give those away.

I loved to get my hands on the old sniper and old rocket launcher

Reaver11 wrote on Wed, 30 April 2008 14:12the M16 in the commando mod is not from westwood.

sure? and the knife beta havoc (logan) wears on the concepts looks similar like in the command mod package too!

so the only beta weapon we have is the pistol...

because the laser rifle and laser chaingun are skins made by commando too.

may be, i can ask e.g. Peter Larsen, if they could get the demo stuff free.

why they should not, its damn old.

OMFG!

EA did more then just put Renegade on Life Support, they shot it in the head and replaced it with this broken engine.

"Real Time Sunlight"

And to think, there cinematics originally were not anything special, they were just like the current cinematics.

I read here:

<http://browse.files.filefront.com/Command+and+Conquer+Renegade+Models+Weapons/1592453/browsefiles.html>

"E3 2001 Silver Laser

e3_2001_lasr.zip

Commando has changed the laser rifle and chaingun to look like they did in E3 2001 game show."

that the laser rifle/chaingun skins are made by commando.

but may be they are from WW, because such a lot of assets from the commando package are from WW.

but the beta laser looks like this:

File Attachments

1) [Concept_LaserRifle1.jpg](#), downloaded 1344 times

Laser Rifle

serverside beta vehicles no mods on the client needed.

found them in the always.dat, problem is, they aren't boned... so i had to re-export the normal tanks as the beta tank's w3d names and place it in the FDS data folder... only downside of doing that is that the vehicles lag over your screen now
