Ok i have a weird problem lol.

I think a windows update caused it sometime in the past but i am not sure and i dont know wtf to do to fix it :S

The problem:

Suppose you want to select a negative number like -250.01 by double clicking on it, you want the selection to include the - sign obviously. But, for some gay reason whenever i double click on a negative number all programs i tried refuse to select the frigging minus sign :S

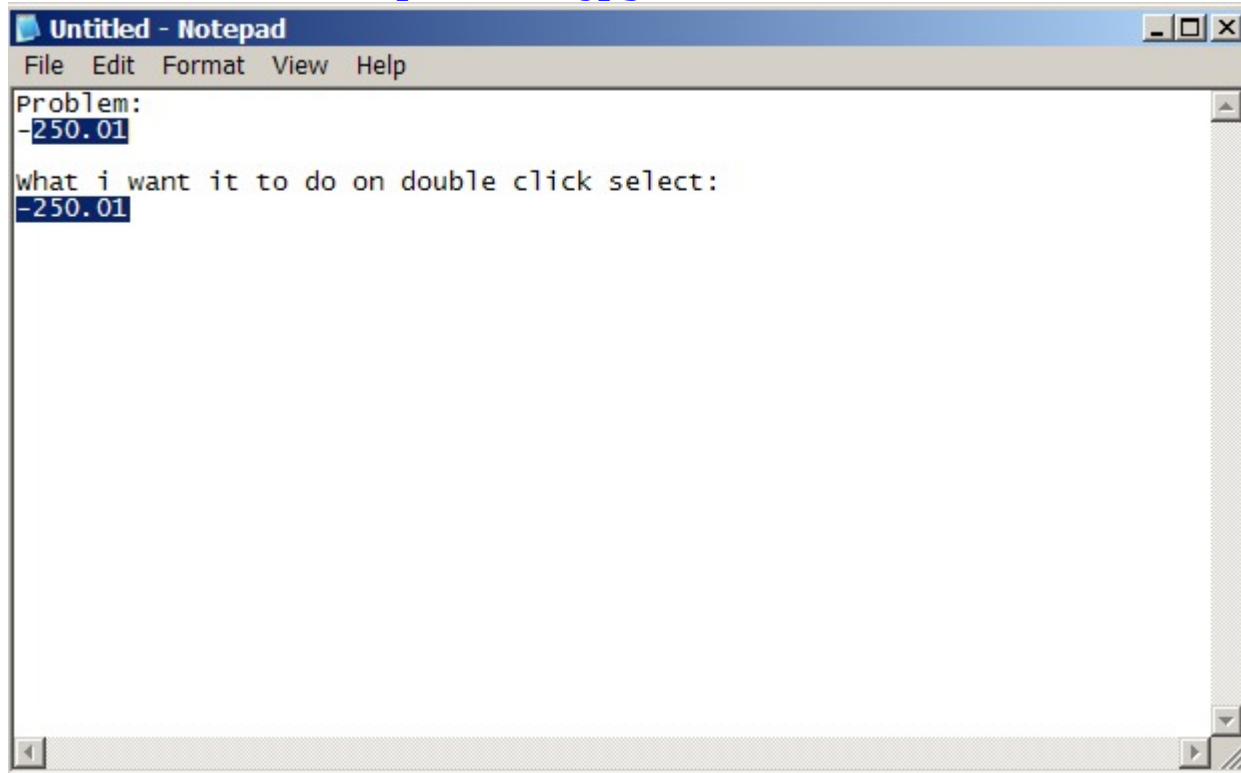

Does anyone know what is causing this? It is sooo annoying lol :S

Thanks

Nevermind problem fixed..  
For some unknown reason "East Asian language" support was enabled on my pc :S  
Turned it off, restarted pc and it was fixed then
