Why can't we roll back to the last release since this release is too unstable? The problem occurs much too frequently with groups of people being kicked and the game crashing. We need this to be fixed soon.

Sounds like someone misses their radar "enhancer".

Because the last version was bypassed.

the new version is too..

Technically it isn't. There's a cheat which Renguard doesn't detect but that cheat doesn't change Renguard in any way.

But I agree with u that it's all the same when someone uses it...

Actually it was bypassed, as a proof-of-concept, but he promised BHS that he wouldn't release it privately or publicly. That's why he made the new version of the cheat you're talking about, with the part that directly affects RenGuard removed.

Well, this time he did the right thing, make it, then tell BHS that he did, then not release it. One step further would be to give them the source code for it so they can fix the bug.

Thank you 0x90.

You shouldn't be thanking him, he made and released a new cheat that bypasses Renguard already. The fact that it doesn't go through Renguard doesn't change anything, its still letting you use cheats while running Renguard..
