Okay, so I'm not saying how I happened to come by this at the moment but I think someone liked that 3D Ripper and decided to use it to rip off RP2's map. Plus, there are some files here that were taken from RenAlert (more than likely without permission).

You should probably report the "thefts" to their appropriate people....

Well that is the whole point of the DX ripper, what else would it be used for.

Yea i personally dont care about the ripping of the models as much as i do about people putting
on even worse and lower resolution textures then they were before!!

As canadacdn put it, it like playing N64 all over again. He has already talked with the author of
the map, about putting credit where due, either way i dont see this map making it very far because
it just looks like crap and most likely plays that way also lol.

Okay, sad though that people don't just come and ask first.

lol wow taking someones else models with out permission. i wish you could make it so you cant
open .mix or .pkg

... i just realized he used 3d ripper

Whoever ripped them didn't do it very well.
The transparency's gone on everything, and it just looks terrible.

I have no idea why WNxElitez did this... It's just freaked up.

Imagine Roleplay 2 on Nintendo 64, now take away all the textures, anything fun, proper vehicle settings, custom characters and ALL the original textures, and add 1 or 2 Renalert vehicles.

Barf Time.

This is WNxElitez ... but on my old account elitez121

1) id just like to say im sorry for using the models of APB and RP2

2) i never released a map for every one to donwload it only gave copies to a few friends.

3) This was my 1st map ever map on renx and i had only been doing it 3 weeks

4) The map Was never finished and those pics where from an old Copy any way .. i mean where were all my OWN skins i made for all the vehicles from APB

5) i never claimed this as my own work ... EVER ...

6) it says who the stuff belongs to on the mini streetwars site
http://www.freewebs.com/cnc-streetwars/

7) it looks bad becuase its was not complete so why say somthing is crap when its not ready, thats like .... driving a car with no interior or exterior decor.... just metal frame .. wires and parts and saying its rubbish

8)I never meant to cause this much trouble and i will be Honest .. i was only using the things as templates till i learnt how to do my own .. like with my practice carpark ..

9) textures look shit becuase i only just started UVW mapping and i was leaving slike textures windows and animated staff till last til i learnt HOW to do it

10) im not working on it any more .. instead now that i leant abit im moving on to my own race track maps which might i say now .. does have the farari from RP2 but only as a test and i havent released that map and im not claiming the vehicle as mine lol

Im very sorry to cause such an upset .. i didnt intentionally make the map to hurt any one and never claimed the work was mine

ok i admit i didnt ask if i could use the models so im sorry

WNxElitez (Noob Map Creater)
