Hello, I need your help. It's been 8 months now since my computers HDD crashed down and I lost 10GB of files for Renegade. I was able to get half-way all the stuff back, except the movies and other stuff which wasn't important.

To make it short, I have a problem. There are 2 old maps I am not able to find=

C&C_Defense.mix + C&C_Lunar_landing_AI.mix

As far as I remember, I've got the Lunarlanding late in 2004 and Defense somewhere in 2005. I looked on hundreds of sites in the past few weeks without success. Times are chaning and many sites from the old days are ending up in a Domain parking Service or are still offline. It seems to be almost impossible to download particular old stuff from the Internet...

Who can post a link or send a message?

Maybe you should ask the people who made it (if you know who made it that is).
