Because You Don't Need To Use Capital Letters On Every Word.

Oh, And You Can Manually Update Renegade By Going To
ftp://ftp.westwood.com/pub/renegade/updates/Renegade_1037_English.exe .

Have Fun.

EDIT: Sure he pirated it? :V

Sounds like you did the no-cd crack before updating. Or that your trying to do it on the first decade version, which is already 1037.

EDIT:

Well, it looks to me like the old file was not found, and that a file of the same name was found. Also, apparently, no update has been done since file contents do not match.

See what I did there?

Also, if you "Downloaded" the game then I'd bet you got some funky version of the files that would be patched, therefor it's giving you that message, basically saying "We can't patch it because the files to be patched aren't there lololz"

Piracy is bad. Shame on you.

Can You Please Help Me Fix It?.

Yeah, heres the solution- Go buy the real version of Renegade, it's really cheap and also can come with the rest of the games in the good C&C "Packs".
