Hey many tower was my idea originally when we made our server with spawning mods lol.

Nice mods btw roshambo, are the harvesters drivable or not? ours arent cause we never coded them to be drivable when spawned.

No, but i can easily make drivable harvs.
<http://www.dansprojects.com/Vids/timer/timer.html> <-- how i made the towers, themepark and most of the stuff you see there.

to make the tower all you do is spawn 50 mamies while standing in the same spot, and they fall ontop of each other.

thats pretty cool ;o wish my w3d viewer worked so i could make turn a character into a harvy or

something

AoBfrost wrote on Fri, 20 July 2007 05:14to make the tower all you do is spawn 50 mamies while standing in the same spot, and they fall ontop of each other.

The problem with that is that it takes so long to spawn 30 or so mammys. I only have to type one line of text and it will do it for me. Or, maybe i want to make a flight of stairs out of blockers? all i do is use the timer to create the blockers as i walk . Only one command and you have a walk way. Soon, it will be just a key you press on your keyboard

I don't think that'll be serverside though.

I haven't used ideslikeu in quite a long time ;o
Use Snagit to get your SSES, much easier. Renegade's doesn't work for some reason :/

Ancient_and_forever wrote on Fri, 20 July 2007 07:57i took some in that server, but they messed up.

picture here

Windowed mode and the png screenshots didn't/don't mix. What scripts version do you have? I don't remember if it was fixed or not.
