Just check the "Is StealthUnit" under the harvester settings.

BTW Stealth_Armour is a powerup that turns your character stealth when you pick it up. Not to turn a vehicle or anything stealth by adding it.

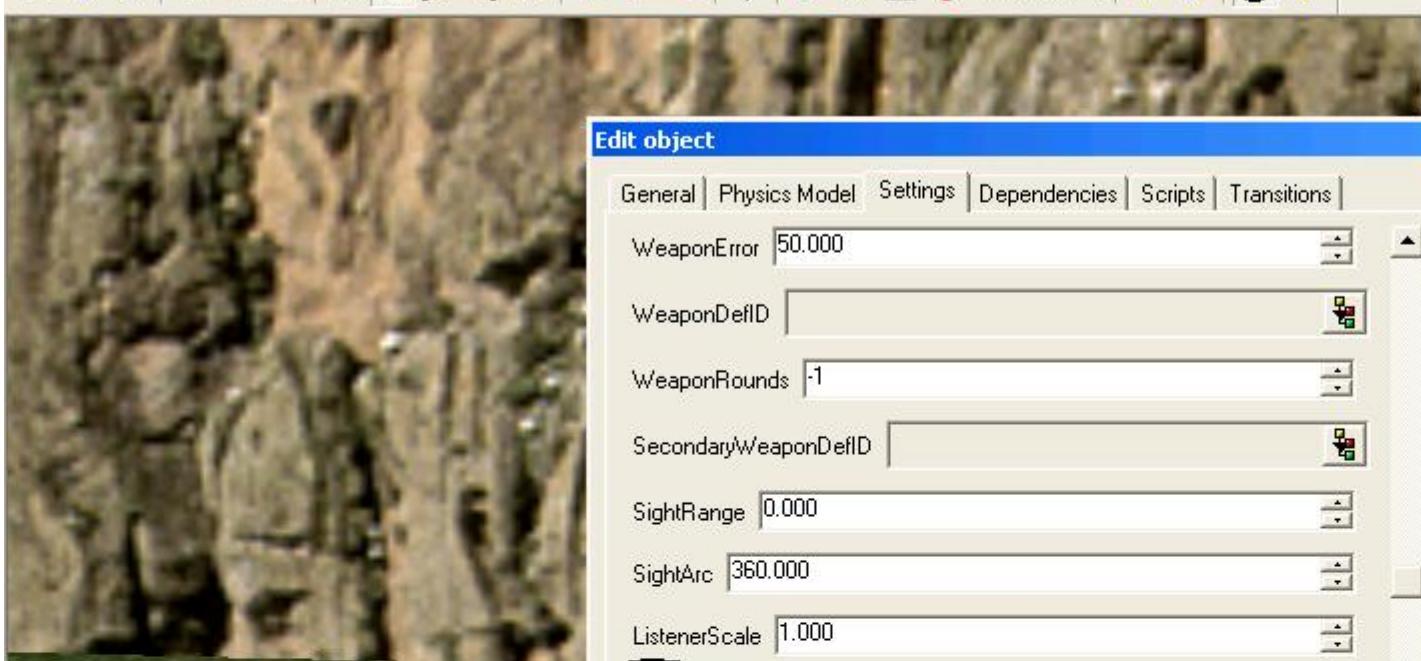

Heres a pic to help you.

Is this for a map? or for a server?

If it's for a server, it won't work serverside.

If it's for a map, it *should* work. :/

You can make it work serverside with certian scripts i thinks

or if your running ssaow u can edit the objects.aow and it will work serverside.

In multiplayer, vehicles without a driver will never become stealedt.

Yeah, so if it does work you'll just have the stealth effect but still see the harvy.

Yeah, so if it does work you'll just have the stealth effect but still see the harvy.

Smth to think about though: on some maps, when PP died, the harv became invisible.

Yrr wrote on Sat, 04 August 2007 02:33In multiplayer, vehicles without a driver will never become stealted.

so you then add on another script to make it think there is a player in it. Stealth tanks in single player were stealth when they were not shooting. and there is no real player in them.

so i dont see why it couldnt work the same way.

And this is for Server Side mod and yes, modifying the Objects.ddb is what I am doing while using SSGM

Invisible is not stealthed. And this is a bug in Renegade (which is fixed in Resurrection and worked-around in Custom Scripts).

That's why I said multi player - in single player mode vehicles are always cloaked unless they fire. Additionaly, enabling/disabling/applying stealth is done client-side. It could work to add an AI driver, but I'm not sure wether the harvester will still drive automatically.

Oblivion made AI stealth tanks go stealth in that map that he used Neosaber's scripts to script a tank battle in the desert while you observe from the sky.

Then he modified the client-side code or added a driver.

It wont work server side. Players would need an objects file with the vehicle being stealth for it to work. You could try and make it stealth with a script but then players without scripts.dll will not see it stealth.

just like the stealth suit, thats fine, I understand that, the server I am making it for most players have the scripts.

i just need to figure out the script...

Thats just stupid EVERYONE needs scripts.dll. You get it when you install Renegade. Don't you mean bhs.dll?

i know but what is the script to put onto the harvesters?

There has to be something. some sorta script that is made for vehicles just like it is for infantry.
