Hello everyone.

ive been looking around the AOW source and example plugins source, and i cant seem to find out how to damn well make a new FDS command (just like mlimit etc)

Is there anyone who could give some example code for me to work and learn from?

Thanks for your time.

Creating new console commands is not possible with SSGM.

It's very possible but I doubt someone will do it and give you the source

It's not possible with the functions SSGM provides, for security reasons. It's maybe possible with a modified version of SSGM.

Dont worry about it guys, ive created a UDP transmission channel admin thingy anyway, i can add my own commands to that

Cheers anyways
