I've seen to misplaced the ol' directx 9 addon package by scorpio, it was a few .dll files and another config file to turn vsync off, antitrophic settings and more. Anyone got it or know where to still get it?

p.s:dont suggest scripts 3.0+ for various reasons.

Use scripts 3.2.

Yes, I'm trying to annoy you.

http://www.renegadeforums.com/index.php?t=getfile&id=3827&rid=20975

It only works with scripts.dll 2.9.2 and earlier. If you have the wrong d3d8.dll in your ren folder when you upgrade or downgrade, there may be problems.
