Farcry multiplayer does not work for me it just says "logging into ubi.com" and just freezes there and I try to lauch the new C&C mod and it just loads then crashes to desktop anyone know why the multiplayer wont work and the mod?

Also I started the first campaign level up and... well just have a look:
http://img442.imageshack.us/img442/814/farcry0001af6.jpg
I will most likely have to go buy a new disc it seems

P.S. Is there any Patches I need to fix this?

Did you forget to install the 1.4 patch first? If that's it, go here:
http://www.ubi.com/US/Downloads/Info.aspx?dlId=691

Depends... if you've never installed any patch whatsoever, you'll need the Cumulative patch (180.6 MB). If you've installed the 1.33 patch previously, you only need the Standalone Patch (123.7 MB). Take a look at the right side of the Far Cry logo in C:\Program Files\Ubisoft\Crytek\Far Cry\fcsplash.bmp and see if something says "Patch 1.##". If it says 1.33, you can use the Standalone patch; if it says 1.1, 1.3, 1.31, or 1.32, you'll need to uninstall and

reinstall Far Cry, and then apply the Cumulative patch; if it says nothing, you can just use the Cumulative patch immediately. Here's what the splash screen looks like:

Edit - changed image to .jpg to conserve filespace and shorten load time

File Attachments
1) fcsplash.jpg, downloaded 804 times

No problem

Now all we have to do is wait for a dedicated server that has the correct map rotation to go up

Ok I put in the patch textures fixed and multiplayer works except the fact it asks for a cd key and I bought this at a garage sale so no original box(and no manual) just the cd case so before I go and buy another copy does anyone have a spare cdkey for farcry they are not using or can i find my cd by looking somewhere on the cd case or in the files?
