I seem to be missing some presets that i need to use.

This is in level edit i dont know where this problem came from cos on my other computer level edit is working fine with all presets there.

Tho on this computer i seem to miss quite a few that makes my modding not possible.

I am using windows vista (for some people that might ask)

And so was my other computer on which it worked great.

And i am running the program in administrator status and in windows Xp.

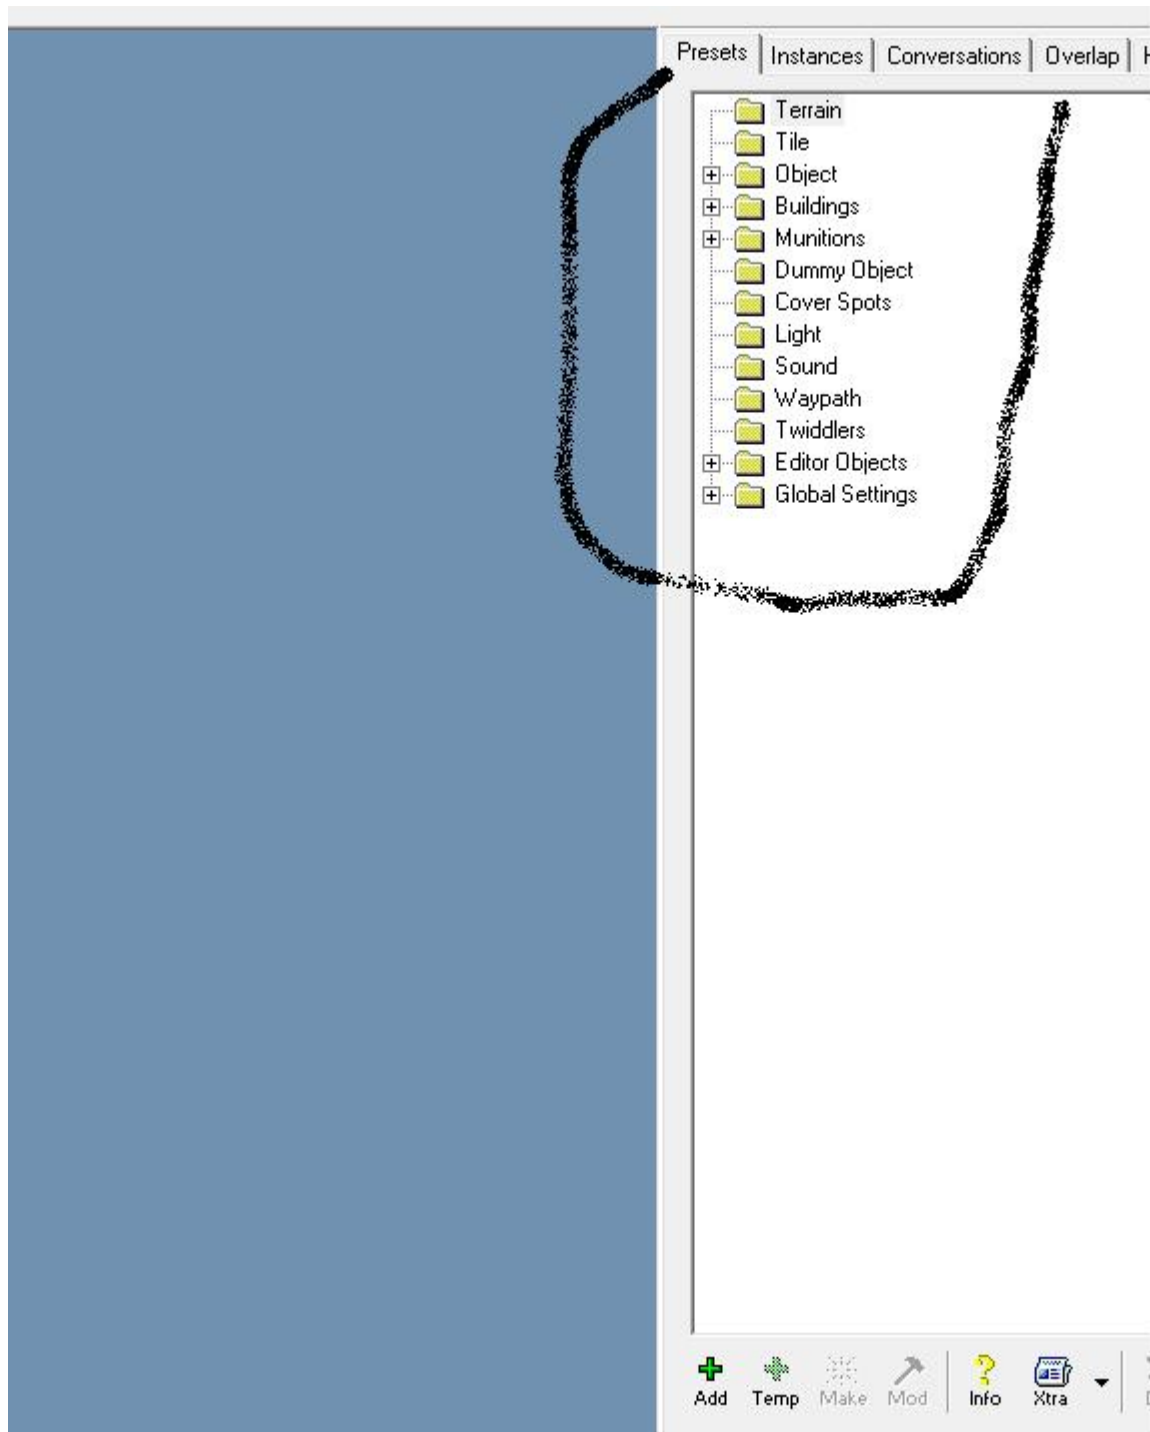

Thanks in advance

Right click shortcut -> properties -> compatibility -> Win XP SP2 mode and tick run as administrator.

Wth? Why are you hijacking someone elses topic? You already made a topic stop taking over other peoples.

I already linked you to this fix, read the post people take the time to post for you. This is also your

second topic in one day about the same subject.

I have followed the tutorial there... but it would seem that the registry knew the correct directory.  
Im using:

XP-SP2  
First Decade  
Tools2

I'm desperate... please help

rember to put the \ at the end of reg entry like

C:\Westwood\Renegade\

or

C:\Program Files\EA Games\Command and Conquer The First Decade\Command and Conquer  
Renegade(tm)Renegade\

Make sure the string value is called "InstallPath"
