I seem te be missing some presets that i need to use.

This is in level edit i dont know where this problem came from cos on my other computer level edit is working fine with all presets there.

Tho on this computer i seem to miss quite a few that makes my modding not possible.

I am using windows vista (for some people that might ask)

And so was my other computer on which it worked great.

And i am running the program in administrator status and in windows Xp.

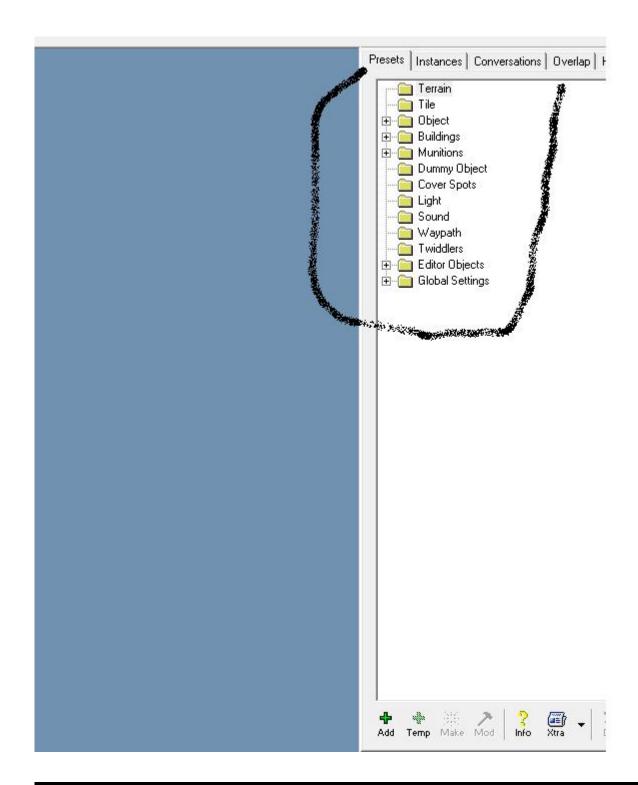

Thanks in advance

rember to put the \ at the end of reg entry like

C:\Westwood\Renegade\

or

C:\Program Files\EA Games\Command and Conquer The First Decade\Command and Conquer Renegade(tm)Renegade\

Make sure the string value is called "InstallPath"
