This file stops youre FPS decreasing in the tunnels. few of us play with low fps so when we enter volcano pp tuns our fps drops nearly to 10 or in a few cases below, so why not make it legal, so for those who dont/ or cant spend money on top notch computers can still play at non slideshow plx.

[View Forum Message](#) <> [Reply to Message](#)

0x90 has (AFAIK) agreed to stop injecting into Renguard. AFAIK, no other cheater can otherwise manage to bypass it. Exactly why someone of 0x90's coding talent bothered to bypass it in the first place (rather than do something constructive) is a mystery.

You need to Email or PM Blazer.

so who is this ox90 guy? is he in rg team? if he is its pretty retarded..

Subject: Re: can you allow this on RG plz?

Posted by [Carrierll](#) on Thu, 13 Sep 2007 15:01:47 GMT

[View Forum Message](#) <> [Reply to Message](#)

No, of course he isn't in the fucking RG team...

He's a german (uber) coder who chose the easier job of breaking down the door, rather than making one.

Not that it was easy, just annoying.

[View Forum Message](#) <> [Reply to Message](#)

Because DDoSing him won't solve the issue of a functioning RG bypass, updating RG will.

[View Forum Message](#) <> [Reply to Message](#)

how many times you updated it already? this is a 5 yr old game. and you still havent maanged to bring out a decent anti cheat software.. Plus wats stopping ox90 training some 1 to beat the newest 1 inc?

I seen ox90 all over cheat forums braggin about it and shit.
(jus googles his name and oh it led me to cheat forums? HAHA)

Look, Kid, Let me put it like this:

He is a cheat creator, He makes cheats for 2 reasons,

- 1# He likes pissing off people for his own amusement.
- 2# He did it so the RenGuard team would get off there asses and prove it has flaws.

He helped the Rg team by explaining what he did, And agreed to stop bypassing it.

Now, you calling him a 'fucking loser' (You're totally geek for saying that, by the way) you're giving him an excuse to start again.

Why not just drop it, And wait for Blazer or Mac to allow your file to be allowed with RenGuard?
Sounds like a great idea to me.

[View Forum Message](#) <> [Reply to Message](#)

Wow, with your attitude, I wouldn't see any reason as to why anyone from the RenGuard team

would even bother taking the time to allow that tweak of yours.

Hell, I don't even see one "Please" or "Thank You" in your submission, and I'm sure your parents taught you politeness, right boss?

If you think that a one vs one on an online game proves you are the better person, you, are, and you might want to take a deep breath before you read the next word -

Wrong

Yes, that's right, you're wrong, you're incorrect. However you might want to put it, that is the case.

Now, stop spamming and typing like an immature person, and please PM Blazer.

(Or buy a graphics card, I mean... you could handle the particle effects with a Radeon 9550. Like... £20?)

Edit - Random ASCII 13's in post o0 - Edit 2 - Still there, I give up.

There has been a ... technical error kinda. It is aproved by Blazer but the renguard network
doesn't seem to aknowledge it just yet.

[View Forum Message](#) <> [Reply to Message](#)

So this probably won't be usable until the new version comes out. Oh wells, and btw, 1grand for a
computer? Call the cops on whoever is selling that to you, that's some overcharging right there.
A comp to play Renegade on, with today's comps, should only cost you like \$600, and that's to
play at maximum graphics too.

But this is a good idea, since I myself need to turn the graphics to the lowest settings as it is. (My
comp was a decent one when Renegade was released...) I'm working on getting that money for a
new one, but there's still time until then. =(
