I would reccomend using vista pack 6, it seems to be the best, it has styler which gives the blue menu bar in windows exploer/my documents like the real vista does, number 7 didnt have it, number 6 had a nice log off screen, number 7 looks like some poorly photoshoped picture as the log off window, also use the start orb for the little round orb start button or else it wont look like the real deal.

That's the way to contribute!

I just stick to my orange XP theme, though I like Vista's look, I don't care enough to change it.

What's wrong with the 'Windows 3.1' look?!

I remember the first windows 3.1 commercial, it was like 10 minutes long and showed specially for those football and sports games, rather than showing 4 different commercials, they showed 1 big one.

"You cant be using the newest mac software, it isnt released from beta yet, if the boss finds out, you'll be fired!"

"it isnt the newest mac, it's windows 3.1!"

"windows 3.1? whats that?!"

"it's better than the newer mac software, it can handle multiple tasks, multiple windows, why i can be typing up a report then play a game!"

"Wow!"

So you tell people to download this in your original post then a day passes and you say don't download this it will break your system... Way to bite yourself on the ass.

lol

Btw, this isn't free. Unless your an illigal pirate, which I don't condone , than you still have to pay for Windowblinds in order to use this.
